

PRESS RELEASE

Timeless glamour

Modern interpretations of timeless motives are en vogue right now and are also becoming increasingly popular among younger audiences. The SPOTLIGHT wallpaper collection is proof that the Glamour Style interior design trend is anything but old-fashioned.

The varied designs, ranging from ornamental creations, classic stripes, nature-inspired leaves and expressive graphic patterns through to striking plan structures combine a glossy look with timelessly elegant worlds of colour to make the most of any room.

The opulent ornamental design looks as if it has been embroidered by hand, as if interwoven with silk threads. Expressive, compelling and truly en vogue. Wonderfully attractive contrasts can be created in combination with colour-coordinated plain or classic striped patterns. Beautiful, lustrous-silky highlights together with a sweeping creative bow motif conjure up subtle lighting effects and create the perfect setting for a exquisite and stylish living ambience.

A detailed leaf design ensures a naturally chic feel. The leaves wind their way up the wall with nonchalant elegance to create real eye-catching jewels. The mixture of a stylish, graphic design and a pure metallic look, on the other hand, produces breathtaking light and 3D effects. A vital, modern ambience results from the interplay of light and shade.

The harmonious colour range extends from soft, natural shades such as ivory, ecru and pearl grey to bolder colour combinations in graphite, dark night and stunning emerald green. The gold, silver and bronze metallic effects which can be found in almost all the designs underscore the premium feel of this collection.

Until: 2023 / 37 premium hot embossed non-woven wallpapers - with striking gloss and metallic effects.
